

Student table

Student_ID	S_Name	S_Surname	S_Age	GPA
150101011	Adil	Abdurrazakli	20	89
150105024	Baba	Semedli	23	Null
150105020	Fatima	Nasibova	21	85
150105005	Emin	Alizade	22	Null
150105011	Rauf	Refizade	21	87

- 1) Create table and insert appropriate data into your table.
- 2) Add a column, “Student_Address” as a varchar2(50) field to the student table.
- 3) Change “Student_ID” column name to “Telebe_nomresi” in the student table.
- 4) Change length of “S_Surname” column to 25 in the student table.
- 5) Drop “Student_Address” column in the student table.
- 6) Change the name of “Student” table to “Telebeler”.
- 7) Update age of Emin whose student id is 150105005, and set it as 21.
- 8) Rauf has left the university whose student id is 150105011. Delete his record from the table.
- 9) Drop “Telebeler” table and then, recover all data again.
